EMPLOYMENT
OPPORTUNITY
ANNOUNCEMENT
STATE OF NEW YORK
UNIFIED COURT SYSTEM

PLEASE POST
ANNOUNCEMENT NO. 1017

THERE ARE CURRENTLY POSITIONS AVAILABLE IN THE DIVISION OF TECHNOLOGY IN THE NETWORK TECHNOLOGIST SERIES AT THE ALBANY AND NEW YORK CITY, NY, LOCATIONS. PLACEMENT TO ANY TITLE WILL BE BASED ON QUALIFICATIONS AND EXPERIENCE.

POSITION TITLE: Principal Network Technologist **JG -28**

BASE SALARY: \$84,897

QUALIFICATIONS: Certification in Network Administration within eighteen (18) months of appointment; and One (1) year of service in the Associate Network Technologist title, or Master's degree in computer science or a related field from an accredited college or university and two (2) years of wide area network operations experience in IBM, LAN using Token Ring, Ethernet, Windows, and OS/2 operating environments and Simple Network Management Protocol; or Bachelor's degree and five (5) years of local/wide area network operations experience in IBM, LAN using Token Ring, Ethernet, Windows, and OS/2 operating environments and Simple Network Management Protocol; or an equivalent combination of education and experience.

DISTINGUISHING FEATURES OF WORK:

Principal Network Technologists are assigned to central or regional Information Technology Services offices where they are responsible for supervising subordinate network technologists and the management of multi-vendor client/server technology environments. They are responsible for complex wide and local area networks in order to ensure availability of services to all users. Principal Network Technologists are responsible for planning and implementation of network strategies in accordance with Department of Information Technology standards, policies, and procedures. Principal Network Technologists coordinate the configuration of complex wide area networks and installation of operating and application software and hardware. They coordinate resolution of problems with the implementation, operation, and maintenance of communication media, computer equipment, and network design, and perform other related duties.

OR

POSITION TITLE: Associate Network Technologist **JG-25**

BASE SALARY: \$72,285

QUALIFICATIONS: Certification in Network Administration within eighteen (18) months of appointment; and One (1) year of service in the Senior Network Technologist title; or Bachelor's degree in computer science or a related field from an accredited college or university and Three (3) years of wide area network operations experience in IBM, Novell, LAN using Token Ring, Ethernet, Windows, and OS/2 operating environments and Simple Network Management Protocol; or Four (4) years of wide area network operations experience in IBM, Novell, LAN using Token Ring, Ethernet, Windows, and OS/2 operating environments and Simple Network Management Protocol; or an equivalent combination of education and experience.

DISTINGUISHING FEATURES OF WORK:

Associate Network Technologists are assigned to central and regional Information Technology Services offices where they are responsible for large, complex or multiple wide area networks, and for supervising Senior Network Technologists and the management of multi-vendor client/server technology environments. They are responsible for wide and local area networks in order to ensure availability of services to all users. Associate Network Technologists are responsible for assisting in planning and implementation of network strategies in accordance with Department of Information Technology standards, policies, and procedures. Associate Network Technologists configure complex wide area networks and install operating and application software and hardware. They resolve problems with the implementation, operation, and maintenance of communication media, computer equipment, and network design, assist local area network administrators and staff of local administrative offices to configure complex local area networks, and perform other related duties.

OR

POSITION TITLE: Senior Network Technologist **JG -23**

BASE SALARY: \$64,834

QUALIFICATIONS: Certification in Network Administration within eighteen (18) months of appointment; and One (1) year of service in the Network Technologist title, or Bachelor's degree in computer science or a related field from an accredited college or university and Two (2) years of wide area network operations experience in IBM, Novell, LAN using Token Ring, Ethernet, Windows, and OS/2 operating environments and Simple Network Management Protocol; or Three (3) years of wide area network operations experience in IBM, Novell, LAN using Token Ring, Ethernet, Windows, and OS/2 operating environments and Simple Network Management Protocol; or an equivalent combination of education and experience.

DISTINGUISHING FEATURES OF WORK:

Senior Network Technologists are assigned to central and regional Information Technology Services offices where, under supervision of network technologists, they are responsible for monitoring complex PC networks and routers, hubs, local and inter-exchange carrier service and other infrastructure components of wide and local area networks in order to ensure the networks are available to all users. Senior Network Technologists configure and install networks, install operating and application software and hardware in accordance with Department of Information Technology standards, policies, and procedures. Senior Network Technologists coordinate the responsibilities of network technologists, and may coordinate activities of local area network administrators assigned to administrative offices. They resolve problems with the implementation, operation, and maintenance of communication media, computer equipment, and network design, assist staff of local administrative offices to resolve wide and local network problems, and perform other related duties.

OR

POSITION TITLE: Network Technologist

JG -21

BASE SALARY: \$58,298

QUALIFICATIONS: Certification in Network Administration within eighteen (18) months of appointment; and One (1) year of service in the Assistant Network Technologist title; or Bachelor's degree in computer science or a related field from an accredited college or university and One (1) year of local area network operations experience; or an equivalent combination of education and experience.

DISTINGUISHING FEATURES OF WORK:

Network Technologists are assigned to central and regional Information Technology Services offices where, under supervision of network technologists, they are responsible for monitoring PC networks and routers, hubs, local and inter-exchange carrier service and other infrastructure components of wide and local area networks to ensure availability to all users. Network Technologists configure and install wide area networks, install operating systems, applications software and hardware in accordance with Department of Information Technology standards, policies, and procedures. They resolve problems with the implementation, operation, and maintenance of communication media, computer equipment, and network design, assist staff of local administrative offices to resolve wide and local network problems, and perform other related duties.

OR

POSITION TITLE: Assistant Network Technologist

JG -18

BASE SALARY: \$49,777

QUALIFICATIONS: Bachelor's degree in computer science or a related field from an accredited college or university and one (1) year of local/wide area network operations experience with Token Ring or Ethernet and Simple Network Management Protocol; or An equivalent combination of education and experience.

DISTINGUISHING FEATURES OF WORK:

Assistant Network Technologists are assigned to central and regional Information Technology Services offices where, under supervision of network technologists, they assist in the responsibility of monitoring PC networks and routers, hubs, local and inter-exchange carrier service and other infrastructure components of wide and local area networks to ensure availability to all users. They assist network technologists to install operating systems, applications software and hardware, and wide area networks in accordance with Department of Information Technology standards, policies, and procedures. They assist network technologists and staff of local administrative offices in the resolution of problems with the implementation, operation, and maintenance of communication media, computer equipment, and network design, and perform other related duties.

LOCATION: Office of Court Administration - Division of Technology, 125 Jordan Road, Troy, NY **or**
25 Beaver Street, New York, NY **or** 187 Wolf Road, Albany, NY

CLASSIFICATION: **NON-COMPETITIVE**

ASSIGNMENT: Network Technologist may be assigned to one or more of the following specialties:

- **Convergent Network Engineer:** Responsible for evaluating, installing, managing, documenting and troubleshooting a comprehensive data, voice and video network. Expertise with fiber and copper wiring, networking routing/switching, Wi-Fi, VPN, Firewall, VoIP, videoconferencing, and video streaming is required. Experience with Avaya/Nortel switches and PBX, or Polycom Videoconferencing, or Vbrick Windows Media Streaming, or network monitoring tools is a plus.
- **Desktop Systems Engineer:** Responsible for installing, evaluating, managing, documenting, and troubleshooting endpoints (PCs, printers, scanners, etc.) and their associated software (Windows XP/7, AntiVirus, Office Suite, etc.) on the enterprise network. Experience with Enterprise Desktop Management Platform, such as Altiris and Symantec SEP, and Windows Server OS is a plus.
- **Server Systems Engineer:** Responsible for installing, evaluating, managing, documenting, and troubleshooting networked servers in the data center. Expertise with IBM Mainframe server, or Unix/Linux server, or Windows servers, or Storage Area Network is required. Working experience with Microsoft Exchange, or SharePoint, or Oracle, or SQL Server, or Datacom/DB, or NetApp products, is a plus.

GENERAL INFORMATION: The above statements are intended to describe the general nature and level of work being performed by persons assigned to this title. They do not include all job duties performed by employees in the title, and every position does not necessarily require these duties. Although a position is available and situated at a specific location, the appointee may be subject to reassignment to any position in the same title in this promotion unit dependent upon the needs of the Unified Court System. All applications received from this announcement may be used to fill any vacancies in this title that may occur in this court or agency within the next six (6) months.

APPLICATION PROCEDURES: All interested persons meeting the minimum qualifications are encouraged to submit a UCS-5 Application for Employment form (obtainable from any administrative office in a court building or on the web at <http://www.nycourts.gov/careers/ucs-5.pdf>) and a resume to:

Susanne Sloan
Principal Court Analyst
Office of Court Administration, Division of Technology
