SEARCH FOR RECORDS REMOTELY

WebSurrogate is an online look-up for files currently on the court's proprietary Universal Case Management System (UCMS). The public can now go onto the court's website (<http://websurrogates.nycourts.gov>) and access records from six (6) pilot courts in New York State. These courts are:

Albany County Surrogate's Court
Erie County Surrogate's Court
Monroe County Surrogate's Court
Orleans County Surrogate's Court
Queens County Surrogate's Court
Westchester County Surrogate's Court

This program will allow access to any file that has been entered into that court's UCMS and allow the user to print out documents from that file. No other authorization will be needed. There is no fee. Please note that if a file or document is impounded or restricted, by statute or Order, it will not be viewable on WebSurrogate. Viewable documents are indicated in blue in the program.

Each court converted to UCMS at different times so their records' availability will be different than Westchester's. In Westchester Surrogate's Court, all files from January 1, 2008 to present are available to be searched. Some older records may be in WebSurrogate, but the complete record for anything prior to this date will only be in the court's office, either in paper or on microfilm.

It is the goal of WebSurrogate developers that all Surrogate's courts' records will be available through this application by the end of this year. As courts roll-out, the web site will be updated.
